

RAE NEWBERY

Data & reporting support for agriculture, ecology and conservation.

ranewbery@hotmail.co.uk | linkedin.com/in/raenewbery | github.com/rnewbery

ABOUT ME

My experience sits across data, reporting and practical project support within agriculture, ecology and the wider biological sciences. I have worked across conservation, charity operations, farm data management and research projects, developing a strong interest in how data can support better decisions in nature-focused and operational settings.

I've found my passion in combining my interest in nature and wildlife with data analysis, working with numbers, building reports, creating charts, running statistical tests and, most importantly, understanding what the data is actually showing

SERVICES OFFERED

- ☐ **Data Management & Reporting:** Data entry, cleaning, validation, reconciliation, spreadsheet improvement, summary reporting, and practical KPI tracking.
- ☐ **Dashboard & Visual Reporting:** Power BI dashboard creation, Excel reporting, performance summaries, chart design, and clear reporting for non-technical users.
- ☐ **GIS Mapping:** Producing and editing habitat, survey, site, and operational maps using QGIS and ArcGIS.
- ☐ **Research & Writing:** Evidence summaries, literature searches, report contributions, project notes, and technical documentation.
- ☐ **Project & Admin Support:** Process documentation, templates, workflow improvement, coordination support, data migration support, and user guides.
- ☐ **Digital & Data Projects:** Simple database-backed web tools, portfolio projects, and practical automation or reporting workflows using SQL, Python, Supabase, and Next.js.

Tools Used:

- Power BI
- Excel
- SQL
- Python
- R
- QGIS
- ArcGIS
- Supabase
- Next.js
- GitHub
- Microsoft Office
- SharePoint / Teams

EXPERIENCE HIGHLIGHTS

☐ **Farm Data & Reporting**

Managed and improved livestock data systems, cleaned and structured operational datasets, and built reporting workflows. Created Power BI dashboards to track various factors.

☐ **Football Prediction Website**

Designed and built a custom football prediction competition website including a public facing interface and admin portal.

☐ **WWF-UK**

Supported large-scale system migration and operational rollout work: data migration, reporting, user guides, process documentation and training support.

☐ **Edinburgh Napier University**

Completed fieldwork, data analysis, habitat mapping, and research tasks as part of MSc Wildlife Biology & Conservation. Used R, GIS, and ecological survey methods to support conservation-focused research.

☐ **University of Reading**

Analysed bird and mammal datasets using R and developed ecological research, statistical analysis, and scientific writing skills through BSc Ecology & Wildlife Conservation.

☐ **Field Researcher**

Carried out marine transects and behavioural research on African penguins, contributing to field data collection and conservation research.

QUALIFICATIONS & CERTIFICATES

☐ **MSc Wildlife Biology & Conservation -**

Edinburgh Napier University (ongoing)

☐ **BSc Ecology & Wildlife Conservation -**

University of Reading (2:1 Honours)

☐ **Data Science Professional Certificate - IBM**

☐ **Project Management for Wildlife**

Conservation - WildTeam
